Interested? Not sure if this is for you? Unsure of where to start? - Read on!

Railway modelling is a creative hobby which can encompass a wide range of skills and activities. This can seem daunting for someone starting out or returning to the hobby after a break. Therefore, we have introduced a major new feature to the Nottingham show – the *Getting Started* section.

This will include demonstrations of modelling techniques, from basic to more advanced, and a chance to get involved, with hands on sessions making scenery, buildings, tracklaying and even operating some of the layouts.

Come along and try out the hobby – we are sure you will find something to inspire you!

Been to our show before?

Then you will expect to see the best in layouts and demonstrations, supported by specialist traders and societies.

Our 2018 show is no different – we still have the very best layouts in most scales and gauges, and all of our usual trade and specialist society support.

Come and see the best layouts and latest developments in this great hobby!
